

Press Release

Smartphone Solutions Renews the Product Range

Helsinki – October 9, 2008: Smartphone Solutions, the market leader for mobile corporate solutions, combines award-winning mobile technologies to meet the needs of corporate customers.

Smartphone Solutions is a service provider delivering safe and easy-to-use wireless solutions for the smartphones of corporate users. The solutions include SmartMail, a true push email solution for mobile email and calendar and SmartManager, a device management solution. In Finland, over 500 organizations have chosen Smartphone Solutions as their mobile solution provider.

Jouni Pennanen, Vice President of Sales at Smartphone Solutions: "For mobile solutions, organisations place an emphasis on security, reliability and a high level of technical service competence. We are delighted to be able to provide our customers with the best-of-breed, award-winning technology. Supporting both Exchange and Domino email systems, our solutions run on all the most common device platforms, leveraging the hardware and software investments the organization has already made.

SEVEN's acclaimed push technology behind the new and more comprehensive SmartMail version

"This summer, Smartphone Solutions released a new version of the popular SmartMail mobile office solution. New functionalities include the ability to use an email account with multiple mobile devices, support for email subfolders and improved user management for corporate use. Furthermore, special attention has been paid to the ease of wireless installation. Anssi Kolehmainen, Regional Director at SEVEN:" SEVEN's solution won the award for 'Best Mobile Messaging Service' at Mobile World

Congress 2008. We are convinced that the new version will continue to support the strong growth and favourable market position of Smartphone Solutions”.

SmartManager device management solution won the top award in London

SmartManager device management solution is based on Fromdistance technology, which won the top award in the MIDAS (Managing Innovative Devices And Services) event held in London by Device Management Forum. Jouko Vierumäki, CEO of Fromdistance: "We are truly happy for the award we received, and for having Smartphone Solutions as a highly competent partner to complement our international sales network. Smartphone Solutions combines our product to excellent service – and we receive a lot of positive feedback for this."

SEVEN is a global provider of mobile messaging software. SEVEN develops software solutions for service providers and mobile operators.
